DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see pages 32-36, filed 10/12/04, with respect to claims 1-58 have been fully considered and are persuasive. The rejection of claims 1-58 has been withdrawn.

Allowable Subject Matter

2. Claims 1-58 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Lin U.S. Patent 6,167,347 discloses a spread spectrum detector in Figure 3 where a Doppler remover 251 removes Doppler shift prior to correlation and integration. Shakeri et al. U.S. PG Pub 2002/0012387 disclose a spread spectrum detector in Figure 2 where Doppler circuit 250 removes Doppler shifts on the correlation outputs from correlator 230. However, the prior art of record fails to teach a spread spectrum detector where a set of first correlation values are produced based upon a received signal, a Doppler shift, and a code, and a second set of correlation values are generated from the first correlation values using a FFT which includes combining a correction for the Doppler shift error with each of the first correlation values, where the second correlation values are then integrated to derive a value that indicates a degree of correspondence of the code with the signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
